

Palo Alto Junior Museum and Zoo

NGSS Aligned Classes Offered

Table of Contents

Kindergarten

Relationships in Ecosystems

- Rainforest Biome
- Riparian Biome⁴
- Mini-Habitats
- Zoo Animals Program⁵

Weather & Climate

- Thermometers

Forces & Interactions

- Balance
- Roller Coasters
- Straw Launchers³
- ENGINEERING - Paper Bridges¹

First Grade

Life Structures & Functions

- Adaptations
- Bats⁵
- ENGINEERING – Biomimicry^{1,4}

Space Systems

- Orbits

Light & Sound

- Illumination
- Light Exploration
- Periscopes
- Sound Exploration

Second Grade

Relationships in Ecosystems

- Animals of Different Habitats⁵
- Plants of Different Habitats⁴
- ENGINEERING -Seed Pods¹
- Baylands
- Deserts⁵

Earth's Processes

- Volcanos & Igneous Rocks
- Weathering & Erosion

Properties of Matter

- Making Recycled Paper²
- Viscosity
- Phase Change

Third Grade

Life Inheritance & Variations

- Bees
- Camouflages⁵
- Fossils

Weather & Climate

- Storms
- Sand Erosion Mitigation

Forces & Interactions

- Bouncing & Rolling
- Magnets
- Static
- ENGINEERING - Marble Paths¹

Fourth Grade

Life Structures & Functions

- Squid Dissection
- Eye Dissection²
- Lung Model

Earth's Processes

- Rock Identification
- Sand Investigation Lab
- ENGINEERING - Earthquake Construction¹

Energy

- Potential vs. Kinetic Energy
- Chemical Energy
- ENGINEERING - Wind Power¹

Fifth Grade

Matter & Energy in Life

- Animal Classification⁵
- Plankton Exploration
- Carnivorous Plants⁴

Earth's Systems

- Water Pollution
- Water Filtration
- ENGINEERING – Submarines¹

Space Systems

- The Reason for the Seasons
- Solar Ovens

Properties of Matter

- Periodic Table Chemistry
- Conservation of Mass
- Mineral Identification
- Chemical Identification

Field Trips

- Explore the Salt Marsh
- Amazing Life of Birds
- Unlock the Secrets of the Foothills
- Can You Survive as an Ohlone?
- Museum & Zoo Visit

Class Fees

- School Programs
- Field Trips

- 1 Requires two class periods.
- 2 Parent volunteers required.
- 3 Large open room required.
- 4 Seasonal
- 5 Animal Programs require masking for all participants.

Palo Alto Junior Museum and Zoo NGSS Classes Offered – Kindergarten

	Lesson	Description	Performance Expectations*
Life Science	Rainforest Biome	Students will learn about what makes a rainforest unique. They will smell and taste food products and be introduced to real rainforest flora and fauna. <i>Please advise instructor of any allergies in advance.</i>	K-ESS2-2 K-ESS3-1 K-PS3-1
	Riparian Biome	Students will learn about what makes the riparian biome unique. They will create a scientific model of a river corridor habitat and meet some riparian flora and fauna.	K-LS1-1 K-ESS3-1 K-PS3-1
	Mini-Habitats	Students will learn about what most animals need to survive. In groups, students will build a temporary terrarium to maintain and observe in the classroom.	K-LS1-1 K-ESS3-1
	Zoo Animal Program	Students will meet a variety of different animals from the Junior Museum and Zoo. The lesson could include a general overview, or a focus on a specific group, such as reptiles, mammals, insects, etc. <i>If you have a special request, please speak with the instructor.</i>	K-LS1-1
Earth Science	Thermometers	Students will use various types of thermometers and learn about their value as a scientific measuring tool. Students will use these tools to measure and compare the temperature of various locations in the area.	K-ESS3-2 K-PS3-1
Physical Science	Balance	Students will explore the concept of balance through balancing their own bodies and the construction of a balance toy	K-PS2-1
	Roller Coasters	Students will discover the effects of gravity's pull on the motion of marbles through experimenting with different configurations of roller coaster tracks.	K-PS2-1
	Straw Launchers	Students will manually adjust the strength and direction of an air launcher to conduct an investigation comparing the effects of these variables on the motion of straw rockets. <i>Straw Launchers requires a large empty indoor space approx. 30ft by 30ft.</i>	K-PS2-1 K-PS2-2
	ENGINEERING - Paper Bridges	In this two-part introduction to the engineering process, students will learn how to manipulate paper to increase its strength. They will work in groups building paper bridges, testing them, and then redesigning and retesting based on their new knowledge. <i>Requires two class periods.</i>	K-2-ETS1

* Our classes are designed to align, but not necessarily fulfill the listed Next Generation Science Standards' grade level Performance Expectations.

For a description of the listed standards, please visit - <http://www.nextgenscience.org/search-standards>

Palo Alto Junior Museum and Zoo NGSS Classes Offered – 1st Grade

	Lesson	Description	Performance Expectations*
Life Science	Adaptations	Students will use their own bodies in a simulation to experience how animals physical traits and behavior affect their survival. Students will also meet a zoo animal and discuss its adaptations.	1-LS1-2
	Bats	Students will learn about senses, light and sound, echolocation, mammalian parent/offspring relationships, and animal survival as exemplified by pictures, artifacts, and a live bat from the zoo. <i>Virtual only due to COVID restrictions for bats.</i>	1-LS1-2 1-PS4-1
	ENGINEERING - Biomimicry	In this two-part engineering lesson, using live carnivorous plants as a model, students will observe and mimic the methods these plants use to capture their prey in order to design a hex-bug trap. <i>Requires two class periods. Only available Sept-Oct and Apr-June.</i>	K-2-ETS1 1-LS1-1
Earth Science	Starlab Planetarium	Students will learn about the patterns of the night sky by entering a portable planetarium and observing our local stellar neighborhood. Currently unavailable due to COVID restrictions.	1-ESS1-1
	Orbits	Students will explore the patterns of motion of planets and stars using marbles and funnels as a model for orbital motion.	1-ESS1-1
Physical Science	Illumination	Students will make observations using light and mirrors in a darkened space to discover that objects can be seen only when illuminated.	1-PS4-2
	Light Exploration	Students will use colored lights, mirrors and various objects to discover that light interacts with materials and can be directed, reflected, transmitted and absorbed.	1-PS4-3
	Periscopes	Students will discover the potential applications of mirrors by each building their own periscope.	1-PS4-4
	Sound Exploration	Students will perform various investigations to explore the relationship between vibrating materials and sound.	1-PS4-1

* Our classes are designed to align, but not necessarily fulfill the listed Next Generation Science Standards' grade level Performance Expectations.

For a description of the listed standards, please visit - <http://www.nextgenscience.org/search-standards>

Palo Alto Junior Museum and Zoo NGSS Classes Offered – 2nd Grade

	Lesson	Description	Performance Expectations*
Life Science	Plants of Different Habitats	Students will witness the diversity of life by making observations of real plants specimens from different habitats.	2-LS4-1
	Animals of Different Habitats	Students will witness the diversity of life by meeting real animal specimens from different habitats.	2-LS4-1
	Deserts	Students will meet real plants and animals of the desert as they explore the diversity of life in this unique and challenging environment.	2-LS4-1
	Salt Marsh (Baylands)	Students will explore the diversity of life within our unique local ecosystem of the San Francisco Bay estuary.	2-LS4-1
	ENGINEERING - Seed pods	In this two-part engineering lesson, students will learn about the needs and challenges plants face in reproduction. Students will then build and test their own individual seed dispersal designs. <i>Requires two class periods.</i>	K-2-ETS1 2-LS2-2 2-PS1-2
Earth Science	Volcanoes and Igneous Rocks	Students will discover how Earth events can occur both quickly and slowly through the phenomena of volcanoes and igneous rock. They will handle and identify a variety of real rock specimens.	2-ESS1-1
	Weathering and Erosion	Students will learn about how Earth structures break apart and move. They will create a model demonstrating how water erodes sand.	2-ESS1-1 2-ESS2-1
Physical Science	Making Recycled Paper	Students will discover how the many small fibers that make up plants are removed and rearranged to form paper. Students will take deconstructed scrap paper and recycle it into new paper. <i>Parent volunteers required.</i>	2-PS1-3
	Viscosity	Students will learn about the physical property of liquids known as "viscosity". They will perform an experiment and record data in order to determine the viscosity of several different liquids.	2-PS1-1
	Phase Changes	Students will learn about how a substance can change from one phase to another. They will perform an investigation and observe examples of phase change.	2-PS1-1 2-PS1-4

* Our classes are designed to align, but not necessarily fulfill the listed Next Generation Science Standards' grade level Performance Expectations.

For a description of the listed standards, please visit - <http://www.nextgenscience.org/search-standards>

Palo Alto Junior Museum and Zoo NGSS Classes Offered – 3rd Grade

	Lesson	Description	Performance Expectations*
Life Science	Bees	Students will learn about honeybees and their unique behavior and social life. They will see artifacts, taste honey, and observe specimens under microscopes.	3-LS2-1 3-LS1-1
	Camouflage	Students will perform an experiment and collect data in order to demonstrate that animals with better camouflage are more likely to survive. Students will also meet a live animal that is a master of camouflage.	3-LS4-3 3-LS3-1 3-LS3-2 3-LS4-2
	Fossils	Students will handle a variety of real fossils and learn about their value as evidence of organisms and environments from Earth's distant past.	3-LS4-1
Earth Science	Storms	Students will learn about severe weather events that occur in different climates of the world and what causes them. The lesson will focus on tornados, lightning, and hurricanes.	3-ESS2-2
	Sand Erosion Mitigation	Students will use a variety of materials (natural and man-made) to experiment in mitigating wind erosion.	3-ESS3-1
Physical Science	Bouncing and Rolling	Students will conduct a scientific experiment and record and analyze data in order to discover what makes an object bounce and roll.	3-PS2-2
	Magnetic Levitation	Students will learn about the non-contact nature of magnetism, and use it to help reduce friction as they work to engineer a simple levitating train.	3-PS2-3 3-PS2-4
	Static	Students will learn how electricity is present in more than just electronics. They will perform static experiments and interact with a Van de Graaff generator.	3-PS2-3
	ENGINEERING - Marble Paths	In this two-part lesson, students will work in groups to design and build a marble ramp in order to meet a specific challenge. They will learn about energy and forces. Students will need substantial time in class between lessons to work on their projects. <i>Requires two class periods.</i>	3-5-ETS1 3-PS2-2

* Our classes are designed to align, but not necessarily fulfill the listed Next Generation Science Standards' grade level Performance Expectations.

For a description of the listed standards, please visit - <http://www.nextgenscience.org/search-standards>

Palo Alto Junior Museum and Zoo NGSS Classes Offered – 4th Grade

	Lesson	Description	Performance Expectations*
Life Science	Squid Dissection	Students will learn about squid internal and external morphology by dissecting real squid specimens.	4-LS1-1
	Eye Dissection	Students will learn to identify the major parts of the mammalian eye and describe the process in which our sense of sight works. They will dissect and examine real cow eyes. <i>Parent volunteers needed.</i>	4-LS1-1 4-LS1-2 4-PS4-2
	Lung Model	Students will learn about the mammalian respiratory system and construct an interactive model of the lungs and diaphragm.	4-LS1-1
Earth Science	Rock Identification	Students will learn about the rock cycle and how to accurately identify rocks by their scientific category.	4-ESS1-1
	Sand Investigation Lab	Students will learn about the diversity of sand across the Earth. They will use microscopes and careful observation to explore the color, size, and special properties of sand.	4-ESS2-1
	ENGINEERING - Earthquake Construction	In this two-part lesson, students will learn about earthquakes, in order to design, test, and redesign/re-test a model building to withstand the shaking of the Earth. <i>Requires two class periods.</i>	3-5-ETS1 4-ESS1-1 4-ESS3-2
Physical Science	Potential vs. Kinetic Energy	Students will learn about mechanical energy and its two forms. Each student will create a toy that is powered by elastic potential energy.	4-PS3-1 4-PS3-2 4-PS3-4
	Chemical Energy	Students will learn about how chemicals can be used to make things work. They will perform some chemical reactions and observe the energy released in the process.	4-ESS3-1
	ENGINEERING - Wind Power	In this two-part lesson, students will work in groups to design, build, and test a wind powered mechanism with the goal of lifting an object. <i>Requires two class periods.</i>	3-5-ETS1 4-PS3-4

* Our classes are designed to align, but not necessarily fulfill the listed Next Generation Science Standards' grade level Performance Expectations.

For a description of the listed standards, please visit - <http://www.nextgenscience.org/search-standards>

Palo Alto Junior Museum and Zoo NGSS Classes Offered – 5th Grade

	Lesson	Description	Performance Expectations*
Life Science	Animal Classification	Students will explore the relationship between all living things through real life encounters with some of our zoo animals.	
	Plankton Exploration	Students will learn about plankton to discover how the biosphere, atmosphere, and climate interact.	5-LS2-1 5-ESS2-1 5-PS3-1
	Carnivorous Plants	Students will be introduced to several real carnivorous plants and learn how they differ from other plants. They will record observations on each plant to determine how they capture their prey. <i>Only available Sept-Oct and Apr-June.</i>	5-LS1-1 5-LS2-1
Earth Science	Water Pollution	Students will learn about the Earth's fresh water and how so much of it becomes polluted. Students will create their own model of polluted water.	5-ESS2-2 5-ESS3-1
	Water Filtration	Students will learn about how we treat polluted water to make it safe for consumption. Students will learn to filter polluted water using real-world techniques.	5-ESS3-1
	ENGINEERING - Submarines	In this two-part lesson, students will explore the concept of buoyancy as they build, modify, and test individual small submarines. Each student will keep their submarine. Substantial class time is needed between lessons to test materials for their projects. <i>Requires two class periods.</i>	3-5-ETS1 5-PS2-1
Space Systems	Starlab Planetarium	<i>Currently unavailable due to COVID restrictions.</i>	5-ESS1-1 5-ESS1-2
	The Reasons for the Seasons	Students will conduct an investigation using a scientific model of the Earth-Sun system to understand the annual pattern of seasons. Students will record measurements and generate an argument for how Earth's axis and orbit generate the seasons.	5-ESS1-2 5-PS2-1
	Solar Ovens	Students will discuss the many forms of energy and Earth's primary energy source, the sun. Each student will build a mini solar cooker to keep. These ovens will remain in the classroom for post-lesson use.	5-ESS1-2 5-PS3-1
Physical Science	Periodic Table Chemistry	Students will learn about the different elements and how they combine to form the world around us. Students will create molecular models and perform chemical reactions of specific chemicals.	5-PS1-1
	Conservation of Mass	Using highly accurate scales, students will investigate various experiments testing the law of conservation of mass.	5-PS1-2 5-PS1-4
	Mineral Identification	Students will use scientific instruments to measure and calculate density and assess other physical properties in order to differentiate and identify specific mineral samples.	5-PS1-3
	Chemical Identification	Students will use chemistry to analyze several properties (pH, solubility, and reactivity) of various powdered kitchen chemicals and use their new knowledge to identify a "mystery" chemical.	5-PS1-3

* Our classes are designed to align, but not necessarily fulfill the listed Next Generation Science Standards' grade level Performance Expectations.

For a description of the listed standards, please visit - <http://www.nextgenscience.org/search-standards>

Palo Alto Junior Museum and Zoo Classes Offered – FIELD TRIPS

Outdoor Lesson and Locations	Description
Explore the Salt Marsh at Palo Alto Baylands	<p>Students discover the inner workings of the salt marsh ecosystem through exploration of microorganisms, plants, birds, and fish in this exciting hands-on program. Go birding to discover the amazing adaptations of our bay birds; spend time in the lab learning about the microscopic life at the base of this ecosystem; discover unique plants that are adapted to living in the salt marsh.</p> <p>Grade Levels: 1st through 6th grade (max 30 students plus 1 chaperone per 5 students). Fishing available for 3rd - 6th graders. Time: 1-3 hours (2.5 hour minimum with fishing) NGSS Disciplinary Core Ideas: LS1.C, LS2.A, LS2.B, LS4.C, LS4.D, ESS2.A, ESS2.C</p>
Amazing Life of Birds at Palo Alto Baylands	<p>Bay birds offer an opportunity for experiential discovery of food chains, ecosystems, and adaptations. Students head outside with binoculars to study bay birds in their natural habitat, play a game of bird beak buffet to understand the importance of beak adaptations, and inspect and discuss our authentic collection of wings, feathers, skulls, and bird mounts with an experienced naturalist.</p> <p>Grade Levels: 1st through 6th grade (max 30 students plus 1 chaperone per 5 students) Time: 2 Hours NGSS Disciplinary Core Ideas: LS1.A, LS1.D, LS2.D, LS3.B, LS4.B, LS4.D</p>
Unlock the Secrets of the Foothills at Foothills Park or Arastradero Park	<p>Soak up the sights, sounds, and smells of the local foothills on an engaging mile hike through beautiful natural parklands. Students take on the role of nature detectives and search for clues to discover the secrets of oak woodland, chaparral, riparian, or grassland ecosystems.</p> <p>Grade Levels: 1st through 6th grade (max 30 students plus 1 chaperone per 5 students) Time: 2 Hours NGSS Disciplinary Core Ideas: LS1.A, LS2.A, LS2.C, LS4.D, ESS2.A, ESS2.E</p>
Can You Survive as an Ohlone? at Foothills Park	<p>Wake up to a day filled with fire-making drills, acorn grinding, stories, and Ohlone games. Students will experience life as an Ohlone child by reenacting their daily activities at our 'trailside village'. End the day with a mile hike to a lake to twist cattails into cordage.</p> <p>Grade Levels: 3rd through 5th grade (max 24 students plus 1 chaperone per 5 students) Time: 2 ½ Hours NGSS Disciplinary Core Ideas: LS2.D, LS4.D, ESS2.E, ESS3.A, ESS3.C</p>

For more information about outdoor programs, contact 650-329-2506 or naturalist@cityofpaloalto.org.

Junior Museum & Zoo Visit at Palo Alto Junior Museum and Zoo	<p>Bring your students to our onsite classroom for a standards-based science lesson of your choice and stay to enjoy the museum, zoo, and nearby park afterwards. (Museum entry for students and chaperones, \$5.)</p> <p>Grade Levels: pre-K through 5th grade (max 24 students plus 1 chaperone per 5 students)</p>
--	--

Advance registration for group museum visits is required. Please call: 650-329-2111.

Palo Alto Junior Museum and Zoo Science Program Fees

School Programs

Number of Programs	Resident Fee	Per Program	Non-Resident Fee	Per Program
1	\$177	\$177	\$204	\$204
2	\$338	\$169	\$390	\$195
3	\$501	\$167	\$579	\$193
4	\$664	\$166	\$768	\$192
5	\$825	\$165	\$950	\$190
6	\$984	\$164	\$1,128	\$188
7	\$1,134	\$162	\$1,309	\$187
8	\$1,288	\$161	\$1,488	\$186
9	\$1,440	\$160	\$1,665	\$185
10 or more	\$1,590	\$159	\$1,840	\$184

Field Trips

Field Trip	Program Length	Resident Fee	Non-Resident Fee
Explore a Salt Marsh (with fishing)	2.5 hours	\$342	\$396
	3 hours	\$404	\$441
	1 hour	\$178	\$205
Explore a Salt Marsh (no fishing)	2 hours	\$261	\$300
	2.5 hours	\$300	\$342
	3 hours	\$342	\$391
Can You Survive as an Ohlone?	2.5 hours	\$334	\$367
Unlock the Secrets of the Foothills	2 hours	\$261	\$300
Amazing Life of Birds	2 hours	\$255	\$292
Junior Museum & Zoo visit with classroom lesson	50 min	\$178 +\$5 per person	\$205 +\$5 per person
